

# Title

Matthew Disimone, Other Authors

University of Illinois at Urbana-Champaign, Department of Nuclear, Plasma, and Radiological Engineering, Urbana, IL 61801

## Introduction

### Sub-title

Example un-ordered list:

- Example acronym call with an example citation [?]
- second bullet point with second use of an acronym

### Sub-title

More text relating to this section, and a third use of the same acronym .

These goals will be achieved by:

- Step to goal
- Step to goal

## Objectives

- Objective 1
- Objective 2

## Program 1

Description

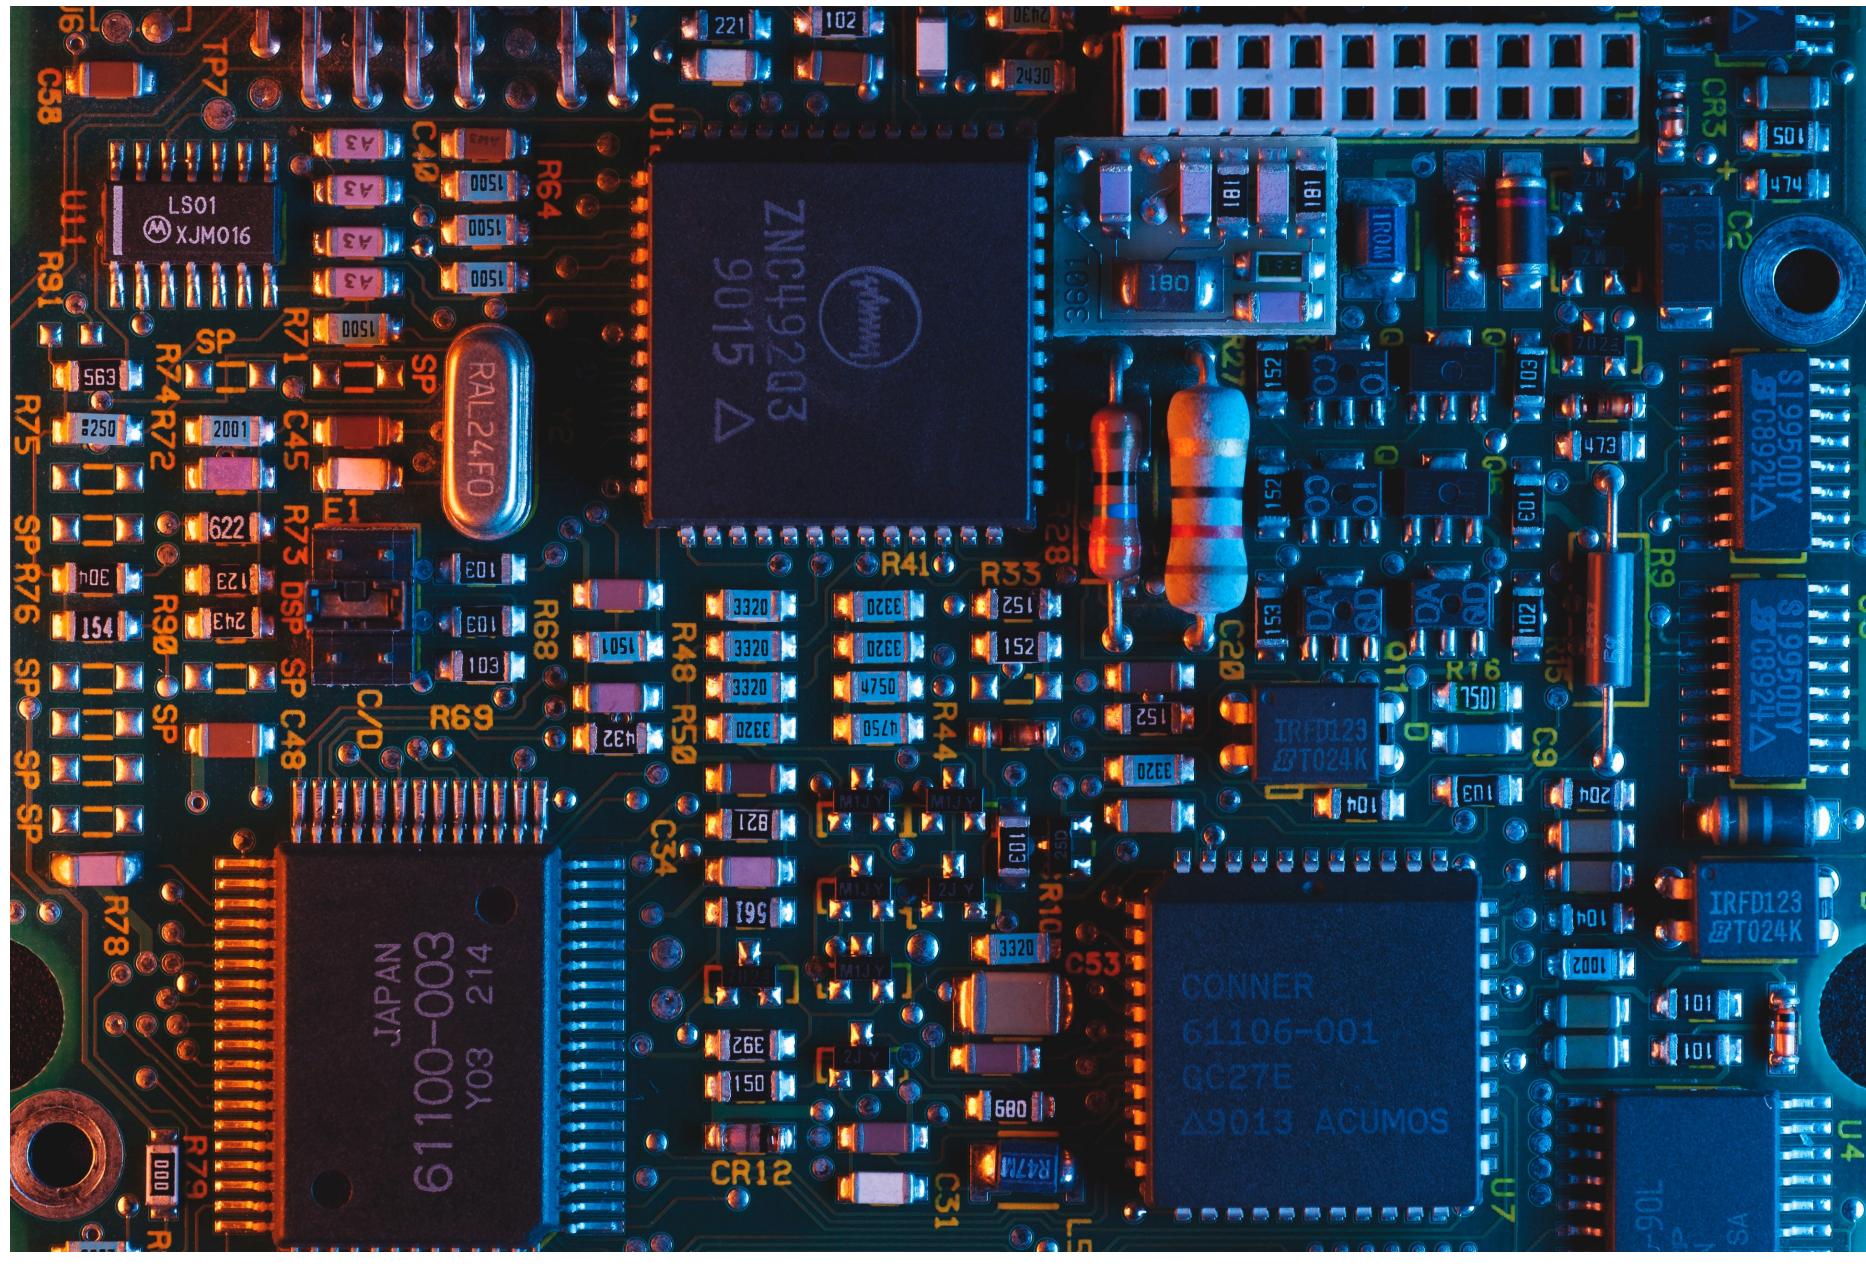

Figure: Caption1 Reference [?]

## Program 2

Description

- Item 1
- Item 2
- Item 3

## Models

### First Model

Description  
Example table

Table: Table caption with citation [?]

Header1	Header2 [Units]	Header3 [Units]	Header3 [Units]
Item 1	100	2.5	2.5
Item 2	100	2.5	2.5
Item 3	100	2.5	2.5

In the waste repository model, the user can define the variables:

- Variable
- Variable
- Variable
- Variable
- Variable

### Second Model

Description

### Third Model

Description with an example of a figure reference  
Figure ?? does stuff

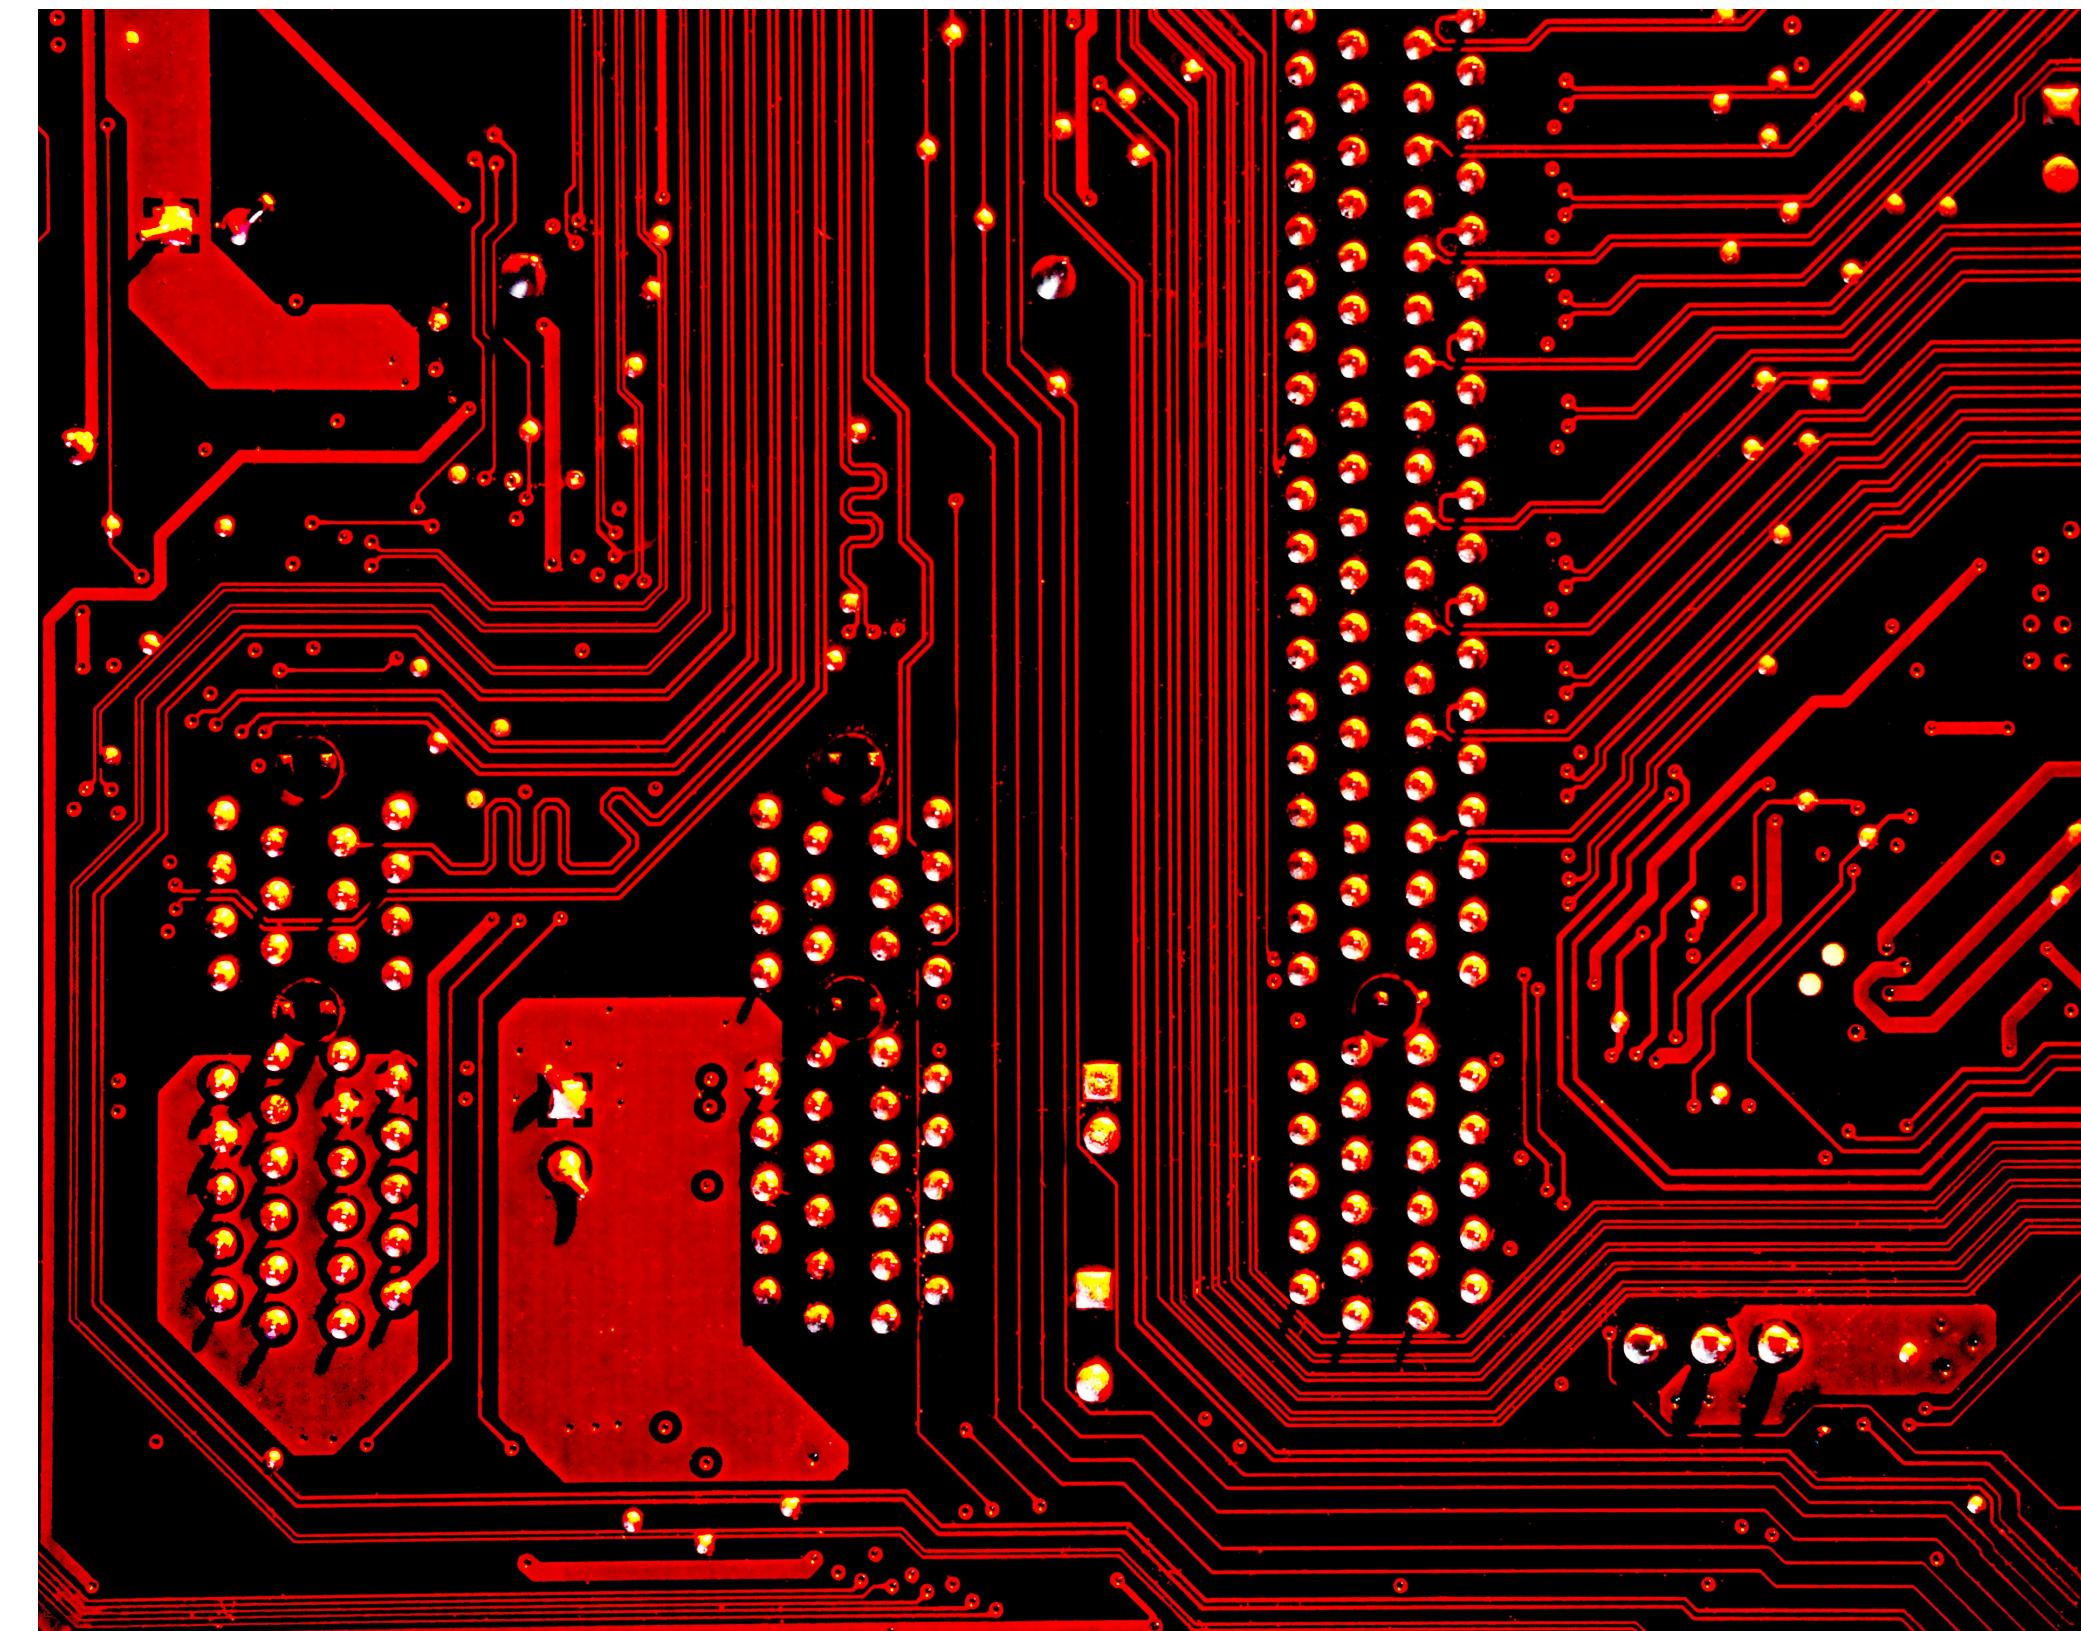

Figure: Caption2 Reference [?]

Description  
Equations

$$y = x$$

Description

$$y = x$$

Description

$$y = x$$

## Results

### Something

Description/analysis  
Contextualization Figure ?? illustrates something.  
Description

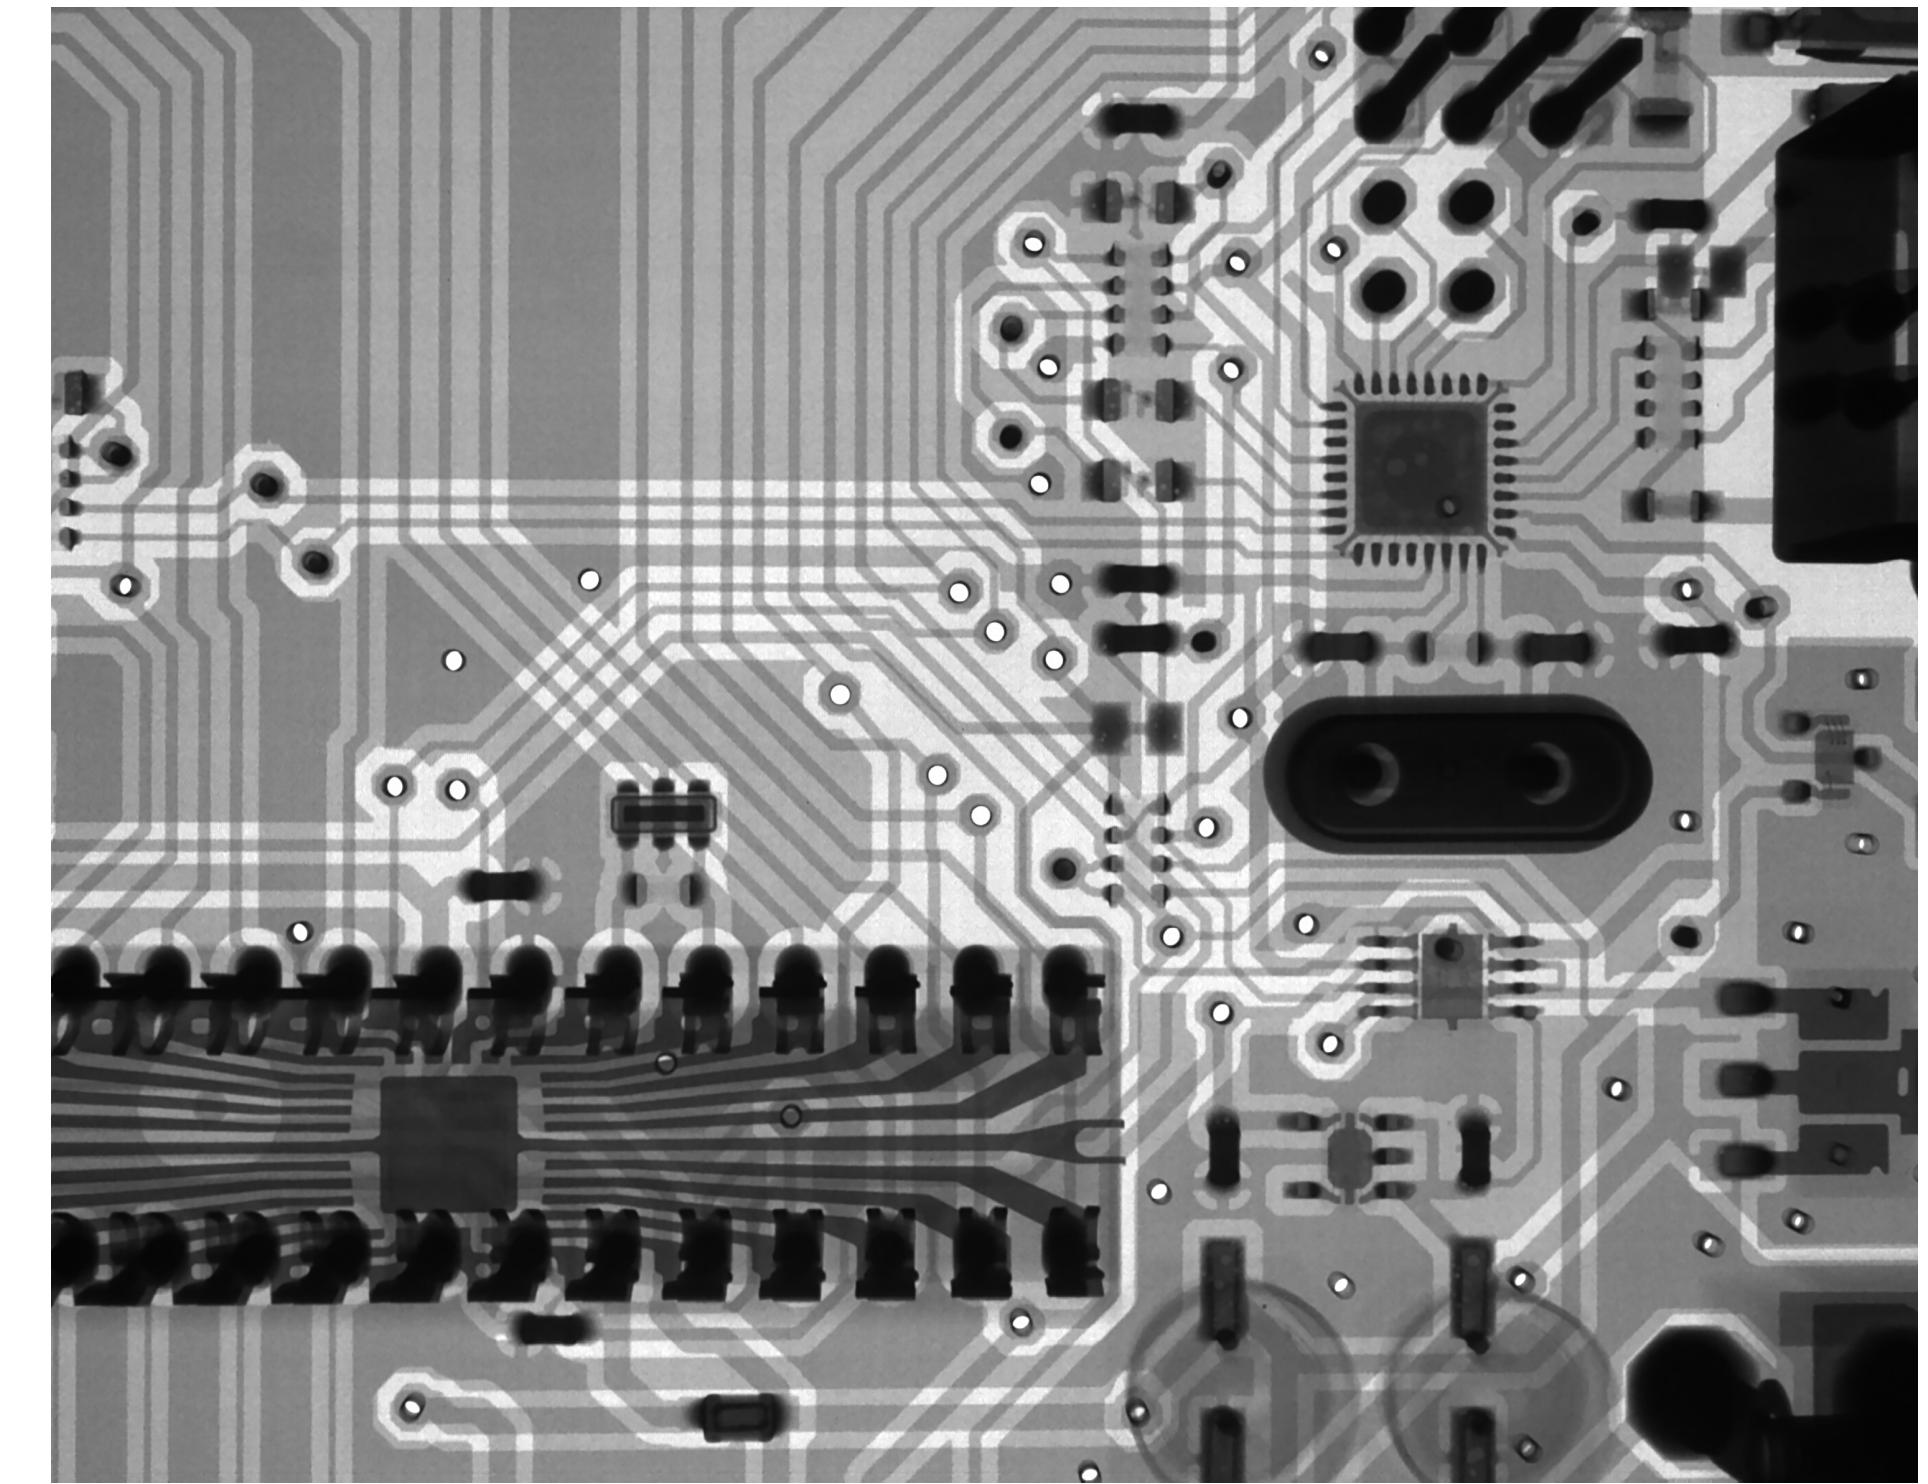

Figure: Caption3 Reference [?]
